Game Title: Press To Move   Screen Shot:

Website/link to game:
http://www.shinylearning.co.uk/freegames/ShinyPressToMove.html

Recommended platform specs: Windows XP, Pentium 3, 256MB ram
10GB HD, Internet browser access, 640x480 screen resolution

Input device requirements: 1 button & a pointing device

Game setup difficulty: Low

Genre: Arcade

General Description: Press to Move is suitable for players who would not be able to manage skilled game interaction. The first part of the game is a configuration page which would be set by an aid, who then starts the game.
The player can then press a single button move the picture (it can be a picture of fish for example) by themselves.
The settings page allows an aid to configure from a selection of pictures to use, which direction the picture moves, weather it has music accompanying, the speed, and weather the background is black or white.
